

New Zealand and the Production of White Phosphorous Bombs Used against Children in Gaza

NZ Super Fund Annuitants Profit from Gaza Children's Agony

By [Dr. Vacy Vlazna](#)

Asia-Pacific Research, May 07, 2015

The shocking [decision](#) by the government-owned New Zealand Super Fund (NZSF) to NOT divest from Israel Chemicals Ltd (ICL), manufacturer of white phosphorus, blatantly violates the NZSF Responsibilities:

“ethical investment including policies, standards and procedures for avoiding prejudice to New Zealand’s reputation as a responsible member of the world community” and Standards for Human Rights: -

1. Support and respect human rights

2. No complicity in abuses...” as set out in the NZSF cautionary but brushed off [Responsible Investment Framework](#).

Moreover, NZSF CEO, Adrian Orr, pragmatically amnesic of Israel’s infinite violations of

international law and UN resolutions, assured members that,

In 2013, Israel said it would find alternatives to white phosphorus, following condemnation of its use on civilians during the 2008-09 Gaza conflict.

“We have no evidence that Israel Chemicals’ product – or any white phosphorus – has been used against civilians in the recent Gaza conflict,” Mr Orr said. “Our analysis suggests Israel Chemicals operates within national and international laws, and conventions NZ has signed.” (LOL)

NZSF analysis, if done at all, is fraudulent. NZSF certainly acknowledges that Israel Chemicals is a supplier of white phosphorus to the US Defense Force.

Yet, easily found on Google, are contract [awards](#) from the US Army Contracting Command to ICL Performance Products for White Phosphorus, Destination- Pine Bluff Arsenal, Pine Bluff, AR to be “used for the Ctg 155mm M110A2”

As for Orr’s profit-induced ‘no evidence’, [The M110 / M110A1 White Phosphorus \(WP\) projectiles](#) are available for 105mm and 155mm howitzers. Used for screening, spotting and signaling purposes, they have an additional incendiary effect on a target and processes casualty producing effects.

The contemptible NZSF’s 16-8-14 decision to continue assisting in the US manufacture of [M110A2](#) was reviewed and reached during Israel’s monstrous war, Operation Protective Edge, against the terrified trapped Gazan population. It shows the NZ fund to be an highly irresponsible member of the world community and a collaborator in Israel’s war crimes.

Synchronistically, on the very same 16-8-14, little [Hamza Mus’ab Almandani](#), 3 ,of Khan Younis, Gaza was in Nasser hospital in excruciating pain suffering from burns, like fire, from artillery shells made in Pine Bluff, USA that were fired on 25-7-14, discharging white incendiary rain on Gaza in hundreds of phosphorous-impregnated felt wedges as Hamza and his family slept.

It is important that NZSF contributors are aware that [White Phosphorous burns](#) at 1500 degrees Fahrenheit or 816 degrees Celsius through skin, muscle and bone and is only contained by blocking off oxygen, but the extreme pain and the horrific tissue damage endures.

In terror, Hamza’s father, Mus’ab, also injured along with his other children Bara and Nada, 5, ran through the tumultuous night carrying Hamza who spent agonising months in hospital. This once happy lively toddler, is now mute from trauma and pain. . . thanks, in part, to NZSF and its members.

NZSF should, at the very least, be paying for this child to have burns treatment in Italy. or Aotearoa New Zealand for that matter.

Contrary to Adrian Orr’s assurance to the New Zealand public, Hamza’s suffering was **DELIBERATELY** inflicted in 2014 in blatant defiance of the 2009 [Human Rights Watch](#), [Amnesty](#) and [witness](#) Reports and the significant UN Goldstone Report on Israel’s war crimes that condemned its illegal use.

Israel inhumanely defied “Protocol III of the 1980 Convention on Conventional Weapons, which prohibits use of the substance as an incendiary weapon against civilian populations and in air attacks against military forces in civilian areas.”

Significantly, Israel’s illegal blockade on Gaza prevents escape by land, sea and air. The alarming Israeli documentary, [The Lab](#), by Yotam Feldman exposes the 1.6 million mothers, fathers, children, are locked in an Israeli laboratory cage that battle-tests weaponry on Gaza. Billions of international dollars from western defense departments and investors, like NZSF, fuel the demand and sanction Israeli atrocities.

NZSF executives, Chair Gavin Walker, Deputy Chair Catherine Savage and Chief Executive Adrian Orr, on \$800,000 plus salaries, sit in their safe and sleek offices making criminally negligent decisions to pour NZ workers’ monies into supporting Israeli companies that are integral to the illegal colonisation and brutal military oppression of Palestine’s indigenous people that has spanned 68 long long years. . . thus NZSF cannot plead ignorance particularly if one also considers New Zealand’s own shameful history of violence against the Maori peoples.

Nor are NZSF beneficiaries morally squeaky clean . Since August last year there have been numerous [calls](#) in the media for NZSF divestment from ICL and protests by a few decent people at the NZSF offices... but no mass demands from the members for divestment.

Other Israeli companies in the NZSF portfolio that also have grounds for divestment are [Strauss Group Ltd](#) which has close connections to the Israeli military, particularly the notoriously vicious Golani and Givati brigades that participated in war crimes in Gaza in 2008/9, 2011 and 2014.

And TEVA Pharmaceuticals has a plant in Har Hotzvim beyond the Green Line making it a settlement factory.

To understand the incestuous links between the majority of Israeli companies steeped in Palestinian blood and tears we can look at TEVA’s CEO.

TEVA’s Erez Vigodman was CEO of the Strauss Group for 8 years, then CEO of Makhteshim Agan which had signed a production agreement with U.S. chemical giant Monsanto to develop an herbicide for weeds that had developed resistance to glyphosate, its popular herbicide marketed as Roundup. Israeli companies have a knack for death and destruction.

NZSF must also check if the Israeli oil companies in its portfolio are involved in the theft of Palestinian oil and gas resources and all Israel Banks have labyrinthine investments in Israel’s arms and security industries.

NZSF ‘has a passive \$900,000 investment in Israel Chemicals Ltd which ethically must be immediately divested along with the majority of its Israel investments.

The NZSF governance its contributors and beneficiaries should, in the manner of all decent people, be absolutely outraged that their monies and blood profits are complicitous in the deaths and inhumane suffering of Palestinian children like little Hamza and divest immediately.

Dr. Vacy Vlazna is Coordinator of Justice for Palestine Matters. She was Human Rights Advisor to the GAM team in the second round of the Acheh peace talks, Helsinki, February

2005 then withdrew on principle. Vacy was coordinator of the East Timor Justice Lobby as well as serving in East Timor with UNAMET and UNTAET from 1999-2001.
